

CASE STUDY

TARO

Taro Pharma Increases Cost-Efficiency by Over 20% With Automated Garment Management by Polytex

THE CHALLENGE

Taro Pharmaceutical Industries was concerned with the high cost related to the company's textile hygiene management procedures. The company required a means of identifying the core cause of the expenditures to cut the costs efficiently.

None of the available textile management solutions could provide Taro with a data-driven process to address the problem.

THE SOLUTION

With the 'Polytex Manager' web application, Taro was able to easily generate an instant overview of the garment exchange frequency and effectiveness, and easily identify the problematic aspects. With the help of Polytex, these areas were addressed with a personalized, automated, and efficient solution.

The Polytex systems automatically provide each of the company's hundreds of lab employees with their assigned, clean garments within seconds. Polytex placed 4 advanced D200 garment dispensing systems at Taro's manufacturing sites. Implementation was simple with the Polytex team providing training and ongoing support.

THE RESULTS:

Reduced cost: Taro was able to significantly reduce its operational cost by 20%. This initial expense-cut was subsequently followed by an additional 20% reduction as a result of a decreased need for garment purchases.

Control and efficiency: With Polytex's advanced and user-friendly monitoring solutions, Taro quickly learned which units remained unused, and was able to further optimize the process.

Uncompromised hygiene: Polytex provided Taro with a range of solutions that allowed the company to cut expenses without jeopardizing hygiene and were aligned with the pharmaceutical industry's high standards.

Employee training: Polytex ensured a seamless transition to its new systems with dedicated training and support. Even the most hesitant employees quickly accommodated to the Polytex systems and found them beneficial and easy to use.

THE BENEFITS:

Cost-efficiency: Being able to fully understand and closely monitor the garment management process enables companies to identify costly blind-spots. The combination of strong monitoring capabilities and fast garment dispensing solutions significantly improves profitability.

Strong reliability: A reliable, around-the-clock solution for garment dispensing provided with employee training and ongoing support.

Impeccable hygiene: Polytex is an expert in healthcare garment management and offers systems that are perfectly sealed and protected, allowing Polytex to meet the pharmaceutical industry's standards and minimize customers' risk levels.

Minimized footprint: Polytex saves valuable floor space with systems that are easily accessed without intruding their surroundings.

We started saving money the moment we began working with Polytex. Now, garment management makes perfect sense and we know exactly how much is spent and why.
